Architecting & Planning

## PROFILE

Highly skilled front-end engineer with experience in architecting and developing scalable projects. Adept at leveraging cutting-edge technologies and best practices to deliver robust and user-centric web applications.

## EMPLOYMENT HISTORY

Senior Software Engineer (Chapter Lead), Berlin, DE  
DeliveryHero SE

Aug 2021 – Present

- Lead and manage a team of frontend engineers, providing guidance, mentorship, and technical leadership.
- Architect and design scalable frontend projects, ensuring efficient code organization and maintainability.
- Develop white label micro frontend applications, customizing them to meet specific client requirements.
- Collaborate with cross-functional teams including product managers, designers, and backend engineers to deliver high-quality and user-friendly frontend solutions.

Frontend Engineer, Brevo (formerly Berlin, DE  
Sendinblue)

Jul 2020 – Aug 2021

- Architect scalable frontend projects, considering factors such as performance, maintainability, and extensibility.
- Collaborate with marketing teams to understand their requirements and translate them into highly configurable ReactJS and NextJS applications.
- Develop and maintain reusable components and libraries for efficient development of marketing-focused applications.
- Collaborate with UX/UI designers to ensure visual consistency and adherence to branding guidelines.

Software Engineer (Frontend Team Lead), Zone Colombo, LK  
24x7

Jul 2018 – Jun 2020

- Lead and manage a frontend team, providing technical guidance, mentorship, and ensuring efficient collaboration within the team.
- Architect and design scalable projects using React Native and ReactJS, focusing on code organization, performance optimization, and maintainability.
- Develop white label web applications, customizing them to meet specific client requirements and branding guidelines.

**Senior Software Engineer (Full Stack), Amaze Media**

Colombo, LK  
(Remote)

Jan 2014 – Jul 2018

- Architect and design scalable software projects in the e-commerce domain, leveraging technologies such as ReactJS, Magento, and Laravel.
- Collaborate with stakeholders to gather requirements, provide technical insights, and ensure alignment between business goals and technical implementation.
- Optimize application performance and ensure secure and reliable data handling for ecommerce transactions.

---
